FLY TANDEM

LEARN MORE ABOUT TANDEM BENEFITS

TANDEM ADVANTAGES
A COMPARISON WITH SIDE-BY-SIDE COCKPIT LAYOUT

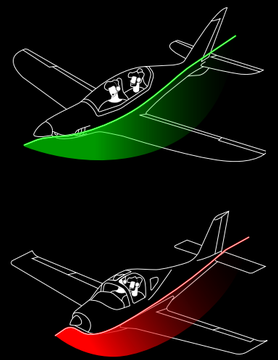

When you're choosing an aircraft, cockpit layout is more than just a comfort preference. It directly impacts how far, how fast, and how efficiently you can fly.

If you're looking for longer range, better performance, lower fuel bills, and fewer headaches, a tandem cockpit layout offers real, measurable advantages.

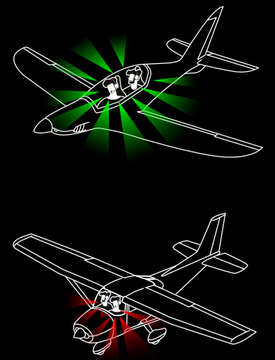

SHARK AERO was the first European aircraft producer to introduce a light sport tandem seater 15 years ago. Since then nearly 200 customers have benefited from its superior aerodynamics, speed, comfort and efficiency.

SHARK FLEW AROUND THE GLOBE BREAKING 6 WORLD RECORDS

ZARA AND MACK RUTHERFORD ABOARD THEIR SHARK AIRCRAFT

BROKE 6 GUINNESS WORLD RECORDS AFTER CIRCUMNAVIGATING

THE GLOBE AS THE YOUNGEST WOMAN AND MAN IN HISTORY

In January 2022 Shark proved its reliability by carrying 19-year-old Zara Rutherford and later on in August 2022 her 17-year-old brother Mack around the world breaking six Guinness World Records and becoming the youngest man and woman in history to circumnavigate the world solo. If these two record-breaking missions are summed-up, they flew 106,000 km or 57,000 nm via 43 countries and 5 continents in all climates and temperatures ranging from -35°C to +48°C. For the longest flight Shark with Mack on board took off from Kushiro, Japan and landed 10 hours later with no stopover nor refuelling in Casco Cove, Alaska while achieving also the longest flight over the water.
